| Effect | Afhankelijk van situatie. De tijdsduur van 'stoffige' werkzaamheden per persoon wordt korter. Echter, bij taakroulatie worden wel meerdere personen hieraan blootgesteld. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Kosten | - | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Toepasbaarheid | In alle sectoren. Sommige werkzaamheden moeten onder droge omstandigheden plaatsvinden, vanwege de productkwaliteit of de aard van de werkzaamheid (graanoogst, drogen van producten). Taakroulatie is eenvoudiger wanneer meerdere mensen op het bedrijf werkzaam zijn en er meerdere werkzaamheden tegelijkertijd kunnen worden uitgevoerd. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Hoe in te voeren? | <ul style="list-style-type: none"> -Opstellen van een taakroulatieschema en/of werkplanning. -Eventueel extra trainingen/instructie voor nieuw uit te voeren taken. Vaak moeten weerstanden bij het personeel worden overwonnen, omdat men bang is niet geschoold te zijn voor nieuwe taken, hangt aan routinematig werk, bepaalde voorkeuren voor taken heeft etc. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Neveneffecten | Bij buitenwerkzaamheden is uitstel vanwege droge omstandigheden (en daardoor veel stof bij grondbewerking) risicovol. Planning van zaai- en oogstcycli e.d. gaat voor. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
